

# Right Engineering®

## Clear Vision Green Mission™

going green  
is easier than ever!

Get started today on  
your solar project and start  
**saving money and the planet!**

High efficiency Solar System  
to manage your daily lighting  
requirement both for Indoors  
and Outdoors including  
Street lights.

## Renewable Energy Solutions using Solar & Lighting Power Saving Solutions using High Power LED

# Solar Street Lighting System

Right Engineering Solar Lighting System is built with Core Energy Management System (EMS) a technology developed by us and proven.

Solar Lighting System encapsulates the energy management system, solar panels and batteries.

Application of Solar Lighting:

- Highway Roads
- Cross Roads and Streets
- Rural Lighting
- Industrial Roads
- Inside Factory Roads, Walkways
- Parks
- Parking Areas
- Rest Areas

Solar Powered Street Light System with Energy Efficient Street Lighting provides Green Energy and Saves our Money.

Advantage of Solar Street Lighting Systems

- Saves your huge power expense.
- Maintenance Free
- If the Streetlight is fitted with LED no need for Lamp Replacement for minimum 50000hrs.
- Provides Lighting even in Remote Villages
- Saving National Resources by transforming to Solar Energy.
- Saves our Planet from Global Warming.

No matter how small the application or how large the project Right Engineering will help guide your business switch to profitable, Renewable Energy and Energy Efficient LED lighting from assessment to implementation of the Green Energy.

Our experienced energy consultants will aid your company in maximizing your energy savings while minimizing your payback period.

At Right Engineering not only we provide complete Renewable Energy and Green Energy LED solutions to increase energy efficiency, we also care to reduce the carbon footprint for the architectural, commercial, residential and industrial market.

We aspire to develop highly aesthetic customized LED Lighting Solutions.

**Outdoor Solar Powered Lighting**  
Outdoor solar lights are easy to install and virtually maintenance free.  
Lower your energy costs and save on your earnings.

# High Power LED Lighting Solution

## Energy Efficient HP LED Lighting

High Power LED Lighting for Indoors & Outdoors.  
Lower your energy costs and material costs.

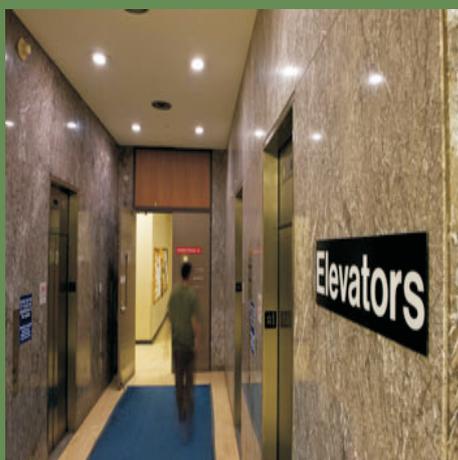

High Power LED Lighting with Solar Powered Anywhere & Everywhere uncompromisingly lighting up our childrens dreams

Energy Efficient High Power LED Lighting Solution for Warehouse

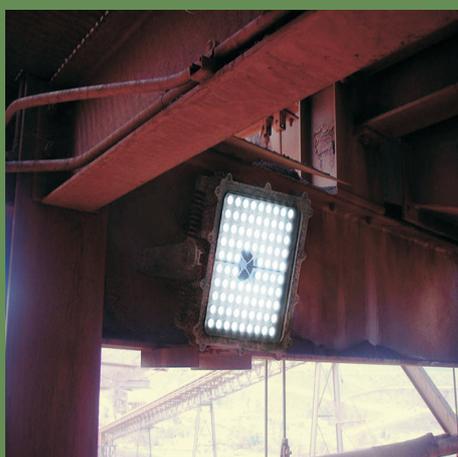

Energy Efficient High Power LED Lighting Solution with Fatigue Free Clear Light Vision for Office

Green Energy Lighting in Petrol Station

Hotels, Commercial Complex and Supermarkets where the light are glowing 24Hrs

Energy Efficient Lighting for Industries

Energy Efficient Lighting in Production & Assembly area in Industries

- Save up to 90% of your lighting energy cost.
- Minimal heat output reduces summer time AC usage.
- 50,000+ hrs usage.
- Light output will not dim during the period.
- Save on material cost by using low power cables and accessories.

# Solar Water Heating System Solution

## Turn to Solar Water Heating System

Save completely on High energy costs for Hotels, Industries and Residence.  
Provide uninterrupted Hot Water supply without any heating cost.

Solar Water Heating Systems are very commonly used in Hotels, Hospitals, Industrial Canteens and in Boiler Pre Heating application and residential. It is possible to design Solar Water Heating System to provide hot water upto 80\*c There is no limitation in the capacity of the system.

## Solar Lantern - Anywhere Lighting

Lanterns manufactured by Right Engineering is primarily a portable light. It can be used in household, small offices, shops and in factory security rooms.

We supply a solar module of 10w power and a lantern consisting of a 12V 7AH maintenance free battery, 7w CFL bulb, electronic circuits - housed in ABS plastic body. Choice of Colors is available while ordering.
